

Editable SVG reconstruction: static object-level evidence

Editor-like handles reveal text, formulas, connectors, and grouped shapes as independent SVG objects.

52 editable text/formula elements in semantic.svg

11 preserved raster assets are marked separately

(a) Reconstructed figure with editable-object overlay

(b) Object-level edit evidence

Selected SVG objects

Each highlight maps to a real editable element or group.

- Text object**
content: "Transformer"
data-pb-editable="true"
- Formula object**
SVG text with subscript spans
role="formula"
- Connector object**
stroke and arrow marker editable
role="connector"
- Grouped node**
rect + text stay separable
role="node"

Raster assets are preserved, not overclaimed
example: data-pb-editable="false"
